Edu Walter Armas Aliaga

Lima, Peru -linkedin.com/in/edu-armas/ - +51 965 728 013 -**eduarmascontact@gmail.com**
https://github.com/BigNight1

Full Stack Developer with more than 2 years of experience leading end-to-end projects in e-commerce, real-time applications and video games. Passionate about innovation, automation and continuous improvement, I master modern technologies such as React, Node.js, Express, MongoDB and Firebase. I stand out for my ability to learn quickly, adaptability and focus on user experience, as well as my ability to translate business requirements into efficient and maintainable technical solutions.

EXPERIENCE

Video Game Developer   *February 2025 - May 2025*
Unity 2D (Bonsai.meme) "Remote".

- I participated in the development of a 2D top-down video game with Unity.

- I joined a foreign team, adapting myself quickly to new technologies and methodologies igiles.

- Coordinated weekly deliveries with international client, optimizing the user experience on PC and mobile.

Full Stack Developer - Project "E-commerce Venta de Polos".   **Lima, Peru**
(Ecommerce Polo Shirts Sale)   *June 2025-Present*

- Led the development of a full stack e-commerce platform, managing both frontend and backend.

- **Frontend:** React, TypeScript, Context API, Tailwind CSS, payment gateway integration, cart management, user authentication, admin panel and responsive user experience.

- **Backend:** Node.js, NestJS, Express, MongoDB, Mongoose, JWT, Passport, payment integration (Izipay), RESTful endpoints, authentication and authorization, order and product management.

- **DevOps:** Deployment in Vercel, version control with Git and GitHub, technical documentation and automated testing.

- Implemented advanced functionalities such as image upload, product reviews, notifications and administrative panel for inventory and order management.

- Publicly available project with documentation and user guides for users and testers.

Front-End Developer - eCommerce Project   **Lima, Peru**
(Independent Project)   *Sep 2022 - Dec 2022*

- Led the complete development of an online store with React and Firebase.
- I built a shopping cart system based on React Context, streamlining the checkout.
- I designed a responsive UI with load times< 2 s (Lighthouse> 90).

EDUCATION

Full Stack Career, Coderhouse   **Buenos Aires, Argentina**
Intensive program that covered Front-End (HTML5, CSS3, JavaScript ES6+, React) and Back-End   *Jan 2021 - Jun 2023*
(Node.js, Express, databases) development; I got certifications in web development and
programming.
