

EDU WALTER ARMAS ALIAGA

Full Stack Developer

Lima, Peru · +51 965 728 013 · eduarmascontact@gmail.com

linkedin.com/in/edu-armas · github.com/BigNight1

PROFESSIONAL PROFILE

Full Stack Developer with 4+ years of experience building scalable web applications with React, TypeScript, Angular, Node.js and NestJS. Specialized in REST API architectures, Clean Architecture, e-commerce platforms, CRM with chatbot and external API integration (META, WhatsApp Business). Experience delivering end-to-end projects for clients in Peru and Chile, using agile methodologies (Scrum/Kanban) with a focus on performance, SEO and user experience. Available for remote or hybrid roles.

PROFESSIONAL EXPERIENCE

Full Stack Developer — E-commerce Venta de Polos

Jun 2025 – Sep 2025

Independent Project · Lima, Peru

- Architected and developed a full stack e-commerce platform with 3+ active clients (entrepreneurs, startups and banking institutions).
- Frontend: React + TypeScript + Tailwind CSS with Context API; shopping cart, authentication, admin panel and responsive UI (Lighthouse > 90).
- Backend: Node.js + NestJS + MongoDB/Mongoose; REST API with JWT, Tupay payment integration, order and inventory management.
- DevOps: deployment on Vercel, CI/CD with GitHub Actions, technical documentation and automated testing.

Video Game Developer — Unity 2D

Feb 2025 – May 2025

Bonsai.meme · Remote

- Developed 2D top-down game mechanics in Unity for an international distributed team.
- Coordinated weekly deliveries with international client using Scrum methodology, optimizing UX on PC and mobile.
- Onboarded into existing codebase in under one week, adapting to new technologies and team workflows.

Full Stack Developer — Makez (Startup)

Nov 2025 – Mar 2026

Remote technical collaboration · Santiago, Chile

- Developed full CRM dashboard with Angular 21 (standalone components, signals) consuming REST API with JWT authentication, route guards and responsive UI with PrimeNG and Tailwind CSS.
- Implemented commercial KPI visualization (conversion, revenue, leads, response rate) with date filters and Chart.js graphs in general mode and per-client view with comparisons.
- Designed REST API backend with NestJS 11 and modular domain architecture (Auth, Leads, Sales, Chatbot, Metrics, Integrations) following Clean Architecture with MongoDB and Mongoose.
- Built chatbot engine with configurable flows and API-type steps: orchestration of external HTTP calls with multiple authentication methods (Bearer, Basic, API Key) and data extraction with JSONPath.
- Integrated META API (WhatsApp Business) for automated messaging via official templates, connecting the chatbot with real communication channels.
- Developed conversion-oriented sales landing page with React and Tailwind CSS for product presentation to end clients.

FEATURED PROJECTS

ArmalyTech — Corporate Website

March 2026

Client · armalytech.com · Lima, Peru

- Developed multi-page corporate website with React 18, Vite and Tailwind CSS; responsive design with PageSpeed score 90-100 across all metrics.
- Implemented serverless API on Vercel (Node.js + Nodemailer) for contact form with validation, XSS sanitization and SMTP delivery.
- Configured full technical SEO (meta OG, canonical, Google Analytics, Google Maps embed) and full-stack deployment on Vercel with SPA rewrites.

ArmalyTech — Desktop Inventory System

Jan 2026 (delivered in 5 days)

Client · Lima, Peru

- Developed desktop application with Electron + React + TypeScript + SQLite for hierarchical inventory management (brands, models, parts) and daily cash closing module (cash and Yape/Plin).
- Implemented bulk import from Excel (multiple sheets, atomic SQLite transactions) with real-time progress feedback via IPC.
- Built secure IPC architecture (preload, contextBridge) and build pipeline with electron-builder to generate Windows installer (NSIS) ready for distribution.

Embedded Chatbot Platform

2025 – 2026

Independent Project for Startup

- Designed and developed a white-label embedded chatbot platform, delivering a production-ready MVP in under 8 weeks.
- Built reusable and configurable React component library for rapid integration into third-party websites.
- Architected scalable backend with Node.js and Socket.IO for real-time messaging.

TECHNOLOGIES & TOOLS

Frontend: React, Angular 21, TypeScript, JavaScript ES6+, Next.js, Tailwind CSS, PrimeNG, Context API, RxJS, HTML5, CSS3, Firebase

Backend: Node.js, NestJS 11, Express, Socket.IO, Passport, JWT, bcrypt, Axios, .NET / C#

Databases: MongoDB, Mongoose, PostgreSQL, SQLite (better-sqlite3)

DevOps: Vercel, Git, GitHub Actions, CI/CD, Electron, electron-builder, Docker, Linux

Testing: Jest, Jasmine, Karma, automated testing

APIs & Integrations: REST API, META API, WhatsApp Business API, JSONPath, ExcelJS, Nodemailer, SMTP

Architecture & Patterns: Clean Architecture, domain-driven modular architecture, Repository Pattern, Dependency Injection, DTO validation, microservices per domain

Methodologies: Scrum, Kanban, Agile, Git Flow

Other: Unity 2D, technical SEO, PageSpeed optimization, responsive design, web accessibility

EDUCATION

Full Stack Development Program

Jan 2021 – Jun 2023

Coderhouse · Buenos Aires, Argentina

Intensive Full Stack development program covering Frontend (HTML5, CSS3, JavaScript ES6+, React) and Backend (Node.js, Express, databases). Over 100 hours of hands-on training.
